

Roll No 3

1Ans) Newton's first law states that an object remains at rest or in uniform motion unless acted upon by an external force.

A book resting on a table is an example.

Newton's Second law states that force equals mass multiplied by acceleration ($F = ma$).

Newton's third law states that every action there is an equal and opposite reaction. When a gun fires a bullet, the gun moves backward.

2Ans :- Voltage is directly proportional to the current.
